

Kiddiegarten's MontessoriPlus™ Curriculum
Research Based Enrichments to Montessori

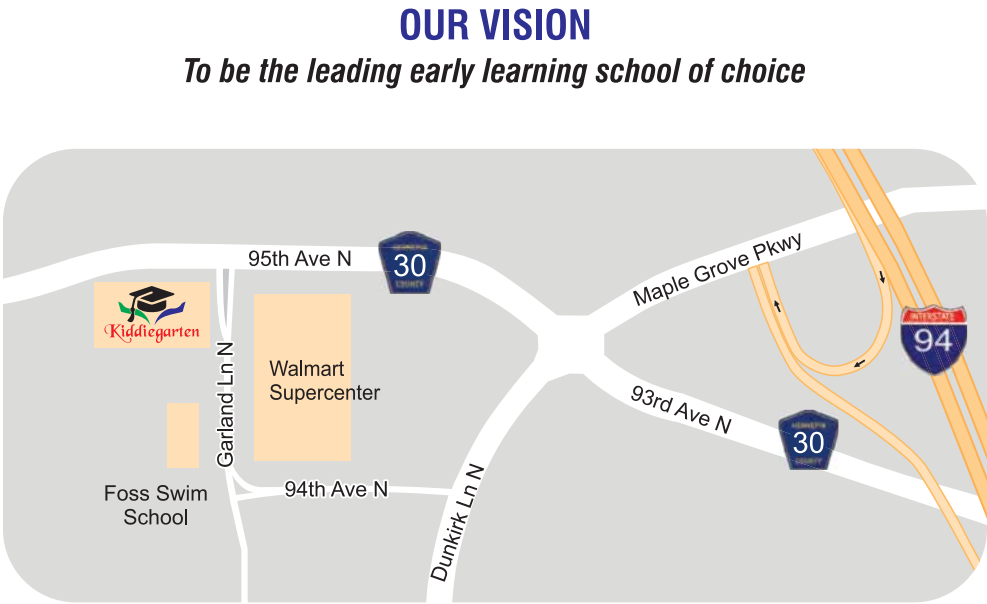

Our **MontessoriPlus™** curriculum takes classical Montessori a step further by enriching it with research based additions. We deliver core elements of Montessori education in the areas of **Practical Life, Sensorial, Language, Math, and Science** using core Montessori philosophy of child initiated, self-regulating, collaborative, and active learning using multi-sensory materials. The classroom environments are designed for exploration into learning centers that have classic Montessori equipment as a foundation.

In addition, our enriched **MontessoriPlus™** curriculum provides development and education in the areas of **Creative Development, Social Justice, Physical Awareness, Computers and Technology, and Resilience**. This is intended to provide a seamless transition to elementary school. We provide individualized developmental assessment, family conferences, and customized development plans. *In summary, we provide an enriching environment where young children with absorbent minds and boundless potential can develop 21st century skills.*
